- Basic Facts about the World

The weekly workshops for students' personality and career development will also be organized.

Learning Days

The school will run for 6 days in a week. Usually, every Monday will be a holiday. There will be no other holiday. In case of sickness, students will have to apply for sick leave and will be readmitted with a qualified doctor's fitness certificate. Changes, if any, to this schedule will be notified.

Examination

1. Monthly and semester exams will be conducted for each student. A student will have to clear at least three monthly exams to be eligible to appear for the subsequent semester exam. At least 80% marks will be required to pass each exam.
2. A student will have to attend the school for at least 24 days in a month to be eligible to appear in the monthly exam.
3. Only those students will be promoted to the next semester who clear at least three monthly exams and the subsequent semester exam.
4. In order to pass the course, a student must clear all the semester exams.
5. The successful students will be given certificate at the end of three semesters. Then their secondary education will begin.

Important: RMN Foundation schools are primarily supposed to be free residential schools to provide the best possible education to poor children particularly from the "totally abandoned" or "economically weaker" sections of society. The current schools for school-going students and those who live with their families are only temporary schools.

A minimum of 15 students are required in a class to start or continue the course.

Schools and parents who want to adopt this modern alternative education system for their children may please contact Rakesh Raman of RMN Foundation.
